

ENGAGEMENT DAY!!

 **Green**
Electricity Tariff

8th AUGUST 2023

Overview of the Energy Commission

The Energy Commission (ST) is responsible for regulating the energy sector, specifically the electricity and piped gas supply industries, in Peninsular Malaysia and Sabah

The roles of the Energy Commission:

What is Green Electricity Tariff (GET)?

GET Powered, your Green Energy

Green Electricity Tariff (GET) is a subscription-based solution catered for eco-friendly consumers and organisations with Environmental, Social and Governance (ESG) goals to power your homes and businesses with **Green Electrons** from renewable energy sources.

Shout out to all ESG conscious companies & community!
It is **HERE!**, it is **TODAY!**

GET subscribed to **Green Energy** 

How does GET work?

Subscription Charges:

Standard tariff rates as per Tariff Schedule applies for your total monthly consumption.

Green Premium Subscription Rate of 21.8sen/kWh
(For total green electricity consumed)

Block Subscription:

Subscribe from a minimum of one (1) block and up to 100% of your average monthly electricity consumption

Residential
1 block = 100 kWh

Non-Residential
1 block = 1,000 kWh

Subscription Period:

- Open for new applicants on **11 August 2023** from **11.00 a.m to 5.00 p.m.**
- GET Consumer is not allowed to **increase, reduce or terminate** the GET subscription during subscription period.
- GET subscription from **1 August 2023** until **31 December 2023**

**Terms & conditions apply*

GET benefits?

Imbalance Cost Pass-Through (ICPT) Exemption

ICPT charges are exempted in your bill for total green electricity consumed (limit up to the number of GET blocks subscribed)

Internationally Recognised

Malaysia Renewable Energy Certificate (mREC) will be issued at the end of the calendar year to certify total green electricity consumed throughout your subscription period.

Malaysia Renewable Energy Certificate (mREC)

1 Reduce the emission from the purchase of electricity under GHG Protocol Scope 2

- For every mREC purchased, 1MWh of electricity purchased from the grid can be exempted from the calculation at the emission factor of 0.78 tonnes CO₂ per MWh*
- Organization can completely zeroize the emission by matching their metered consumption with the purchase of mREC

2 Quality and credible green electricity assured under mREC

- mREC is certified by the I-REC standard which is acceptable internationally and recognized by the RE100
- The source of mREC is from the RE generators (i.e. LSS and hydro) connected to the national grid that makes the claim more credible as compared to off-grid

3 Supporting the green and sustainable agenda

- The proceeds of GET is to be ploughed back for more sustainability initiatives hence contributing to the national green agenda
- Purchasing GET can be part of the organization's Corporate Social Responsibility (CSR) in lowering national carbon footprint

mREC redemption statement info

THE INTERNATIONAL REC STANDARD

This Redemption Statement has been produced for
**WISMA SUMBER ASLI,
 KEMENTERIAN SUMBER ASLI, ALAM SEKITAR
 DAN PERUBAHAN IKLIM**
 by
TNBX SDN. BHD.
 confirming the redemption of
A EAO
XXX MWh of
 electricity generated from renewable sources
 This Statement relates to electricity consumption located at or in
**Wisma Sumber Asli
 Lot 463, No. 25 Persiaran Perdana
 Presint 4, 62574 Putrajaya
 Malaysia**
 In respect of the reporting period
2022-02-01 to 2022-12-31
 The stated Redemption Purpose is
 To Offset an Approximate **XXX** tonnes of Carbon Dioxide Emissions from
 non-renewable Electricity

Green Electricity Tariff **RENDA NASIONAL** **TNBX**
Evident

QR Code Verification
 Verify the status of this Redemption Statement by scanning the QR code on the
 left and entering in the Verification Key below
Verification Key
XXX

- 1 **Company Name**
- 2 **Amount of RECs in MWh**
- 3 **Company Address**
- 4 **Period of Redemption**
- 5 **Emissions Offset**
- 6 **QR Code Verification at I-REC Platform**

Redeemed Certificates

Production Device Details						
Device	Country of Origin	Energy Source	Technology	Supported	Commissioning Date	Carbon (CO ₂ / MWh)
Sultan Ismail Petra Hydro Generating Facility, Pergau (4 units x 150 MW)	Malaysia	Hydro-electric	Dam	No	1997-07-01	0.000

 - Issuer

COMPONENTS INVOLVED IN DETERMINING THE GREEN ELECTRICITY TARIFF (GET) PREMIUM CHARGE:

Green energy procurement costs

Consideration on electricity tariff framework

Supply & demand for green energy

Benchmarking with neighbouring countries

Balancing of RE intermittency costs

Renewable Energy Certificate (REC) Costs

Subscribe GET to convert electricity consumption to Green Energy

Visit myTNB portal at www.myTNB.com.my to subscribe GET

GET subscription will be opening on

11 August 2023, from 11am - 5pm

*For TNB customers who pay the full ICPT surcharge
